The Scope of the International Scientific Conference eRA-12 is the International Synergy in Energy, Environment and Tourism as well as the contribution of Information Technology to Science, Economy, Society and Education.

National and international researchers, technologists, and practitioners are invited to present their latest projects on topics of interest which include but are not limited to the following scientific topics:

- Information Technology
- Telecommunications/Telematics
- Control Systems and Automation
- Nanotechnology and Nanomaterials
- Novel Energy Technologies  
(Wind, Solar, Biomass & Biofuels, Hydro, Geothermal, Waste-to energy, Energy storage, Hydrogen and fuel cell, Hybrid systems)
- Energy efficiency and energy transportation
- Energy policy and development strategy
- Nuclear energy development prospective
- Production Technologies and Quality
- Novel IT based control and management systems
- Interconnection and integration systems
- End-use applications: Utility, Commercial and industrial, Residential, Distributed generation
- E – Commerce and Customer Relationship Management
- Tourism industry and ICT and Telematics
- Project and Production Management
- Management and Business Administration
- Marketing, Accounting and Logistics
- Human Resources Management
- Market trends and barriers
- Green power programs and marketing
- Renewable energy standards credits and certificates
- National and regional energy security implications
- Education, Research and Development
- International scientific tourism and public education of energy generation and distribution related issues
- State and local incentive programs
- International opportunities and challenges
- Liaison office – Entrepreneurship – Counseling
- History of energy efficiency technologies
- Ancient renewable energy methods and tools
